## cassette tape to CD transfers - 2008

Cassette Tape transfer costs below are based on each side of 3 lengths of commercially produced tape. There are 2 extra options that enhance the digital media but do not affect the original sound quality that in large part affected by the condition of the original tape, the machine it was recorded on and the machine it is played back on.

Stereo tape transfers are always done on very high quality, regularly cleaned, demagnetised, serviced and calibrated 3 head Nakamichi tape decks. These have adjustable playhead azimuth,

which can be altered, if necessary, for the best playback output of higher frequencies.

Editing such as creating custom track points, reordering of tracks, shortening or fading, etc is available aswell as restoration for particularly poor recordings with excessive tape hiss or other problems.

Options for computer file conversion into any required file type, compressed or lossless are available.

Audio Cassette Tape Length / Type charged per side of tape length	Basic Transfer High quality transfer using Nakamichi 680 or RX505 tape deck / HHB Pro. CD media / track points created for each side of tape.	Intermediate Transfer Same high quality transfer as Basic but with custom track points for easy CD navigation.	Editing / Restoration As Basic but with custom editing and sympathetic digital restoration as to your requirements.
<b>C60</b> Lo or Hi Bias / Dolby B, C or dbx noise reduction	<b>£10.00 per tape</b> minimum charge £20.00	<b>£15.00 per tape</b>	<b>P.O.A.</b>

## *DAT and Minidisc to CD transfers - 2008*

Audio transfers from digital formats such as DAT and Minidisc are always transferred in the digital domain.

All transfers use the highest quality machines but as in our other transfer services, the basic transfer is more affordable as not trackpoint editing is performed on it. For easy navigation of the CD and if there is more than one track, track points can be created but are chargeable due to the extra time taken.

Digital Audio Tape / Disc Length / Type	Basic Transfer	Intermediate Transfer	Editing / Restoration
	High quality transfer using Sony PCM-7030 and 2600 pro DAT machines, Sony Minidisc machine and Focusrite digital audio interface.	Same high quality transfer as Basic but with custom track points for easy CD navigation.	As Basic but with custom editing and sympathetic digital restoration as to your requirements.
DAT (digital audio tape)	<b>£15.00 per hour</b> minimum charge £20.00	<b>extra £5.00 per DAT</b>	<b>P.O.A.</b>
Minidisc - SP, LP2, LP4 HiMD Minidisc	<b>£10.00 per hour</b> minimum charge £20.00	<b>extra £5.00 per disc</b>	<b>P.O.A.</b>

CD Printing and Packaging Options	All CD's will be supplied in single or double jewel cases with standard transfer information printed on inlay, CD surface printing is extra.	CD supplied in plain recycled card sleeve with no transfer information printed on surface or card.	CD surface and inlay card printed with transfer information as to your requirements in full colour or black and white.
price adjustment per side	<b>£0.00</b>	<b>- £1.00 per side</b>	<b>P.O.A.</b>

CD Extra Copy Options	Extra CD copy with no surface transfer information supplied in a plain recycled card sleeve	Extra CD copy packaged in CD jewel case with transfer information on printed card inlay	Extra CD copy printed with the standard transfer information but packaged in standard CD case with printed card inlay
price adjustment per CD	<b>£3.00 per extra CD</b>	<b>£5.00 per extra CD</b>	<b>£5.00 per extra CD</b>
